SKILLS

HTML, CSS, JAVASCRIPT, PYTHON
BAISC KNOWLEDGE IN MY SQL

TOOLS USED

GIT & GIT HUB, VISUAL STUDIO

PROJECTS

Uiversity of Nebraska-Lincoln Website Clone

- Built the Website foundation using HTML5
- Used Chrome Dev Tools to understand and find elements based on the university's website and added a few modifications
- Implemented CSS for the design and layouts, specifically using CSS Grid AND Flex and other different CSS properties and then JavaScript to create a scroll-to-top function to help users get back to the top easily.

Training Website for International Students wanting to study in the USA

- Building this website using HTML5, CSS, and JAVASCRIPT. Currently, work in progress.
- The layouts and design are being implemented with CSS, while the foundation with HTML5
- Will add a few interactions with EventListeners and click function to give feedback on the user's progress and only unlock when the level is complete using Javascript.
